

Australian Government Financial Reporting Council

# AUDIT QUALITY IN AUSTRALIA:

# THE PERSPECTIVES OF PROFESSIONAL INVESTORS

**MARCH 2019** 

#### The Financial Reporting Council (FRC)

The FRC is responsible for overseeing the effectiveness of the financial reporting system in Australia. Its key functions include the oversight of the accounting and auditing standards setting processes for the public and private sectors, providing strategic advice in relation to the quality of audits conducted by Australian auditors, and advising the Minister on these and related matters to the extent that they affect the financial reporting system in Australia. The FRC monitors the development of international accounting and auditing standards, works to further the development of a single set of accounting and auditing standards for world-wide use and promotes the adoption of these standards. It is a statutory body under Part 12 of the <u>Australian Securities and Investments Commission Act 2001</u> (the ASIC Act).

#### The Auditing and Assurance Standards Board (AUASB)

The AUASB is a non-corporate Commonwealth entity of the Australian Government, responsible for developing, issuing and maintaining auditing and assurance standards. Sound public interest-oriented auditing and assurance standards are necessary to reinforce the credibility of the auditing and assurance processes for those who use financial and other information. The AUASB standards are legally enforceable for audits or reviews of financial reports required under the Corporations Act 2001.

The AUASB's role extends to liaison with other standards setters and participation in standard-setting initiatives.

### AUDIT QUALITY IN AUSTRALIA:

### THE PERSPECTIVES OF PROFESSIONAL INVESTORS

### CONTENTS

Introduction	4
Executive summary	6
Results	7
Appendix 1: Raw data of results	14

### Introduction

The Financial Reporting Council (FRC) is the peak body responsible for overseeing the effectiveness of the

financial reporting system in Australia. Audit quality is integral to the effectiveness of the financial reporting system and accordingly the FRC has a strategic priority to monitor the quality of audits carried out by Australian auditors.

Regulators in Australia and internationally have continued to raise concerns in relation to the quality of external audits. Whilst the most recent Australian Securities & Investments Commission (ASIC) <u>Audit Inspection findings</u> showed a slight improvement, they also reinforce that further work is required.

In recognising that ASIC inspection findings are just one aspect of audit quality and that this is a multi-dimensional concept, the FRC, in conjunction with the Auditing and Assurance Standards Board (AUASB), are engaging with key stakeholders to understand their perspectives on audit quality in Australia. As the objective of the external audit is to provide confidence to investors in the quality of the financial report, their views are vitally important

As the objective of an external audit is to provide confidence to

investors in the quality of financial reports, their views are vitally important. To facilitate this we have conducted a survey to gather professional investors' views on their perceptions of audit quality, the value of audit, and the influences. This report details the results of this survey.

The FRC and the AUASB have also previously conducted a survey of Audit Committee Chairs, as they also play a vital role in the oversight of financial reporting and the performance and quality of the external auditor. The results are available <u>here</u>.

We thank the investors who completed this survey and for generously sharing their views and experiences concerning audit quality with us.

#### Survey participants

This survey was distributed by the following bodies to their members: The Association of Superannuation Funds of Australia, Corporate Reporting Users Forum, Australian Council of Superannuation Investors, Financial Services Council, and Australian Institute of Superannuation Trustees. We thank them for their assistance.

The survey was completed by 47 professional investors in the current roles of: Portfolio / investment managers (43.5%) Research analysts (26.1%) Shareholders (8.7%) Other<sup>\*</sup> (21.7%)

i.e. CEO of Fund Manager, Superfund Executive, CFO, Director, Chief Investment Manager, CFO, Risk and Governance Officer, Compliance Officer

#### Methodology

In order to aid comparability of the responses with an international perspective on audit quality, we have leveraged off the approach of the CFA Institute, who conducts a regular international <u>survey</u>. We elected to replicate specific questions from their survey in order to provide us with a direct comparison to their members' perspectives. We also asked for comments to provide further insights into the factors they considered when assessing the quality, utility and economic value of audit. We further asked questions on the priority that audit regulators / standard-setters should give to specific areas. In each case we compare the Australian results from this survey with the CFA Institute's international results. In some instances an invalid response was received for a question and in these instances the reported rating is based on valid responses.

## Confidential Draft

### **Executive summary**

To assess the overall view of professional investors, we asked the following question:

### "Which of the following best describes your **overall view** of audit quality in Australia?"

Overall, 93% of professional investors indicated audit quality is "average" or "above". Correspondingly, only 7% indicated audit quality is below average or poor. (Figure 1)

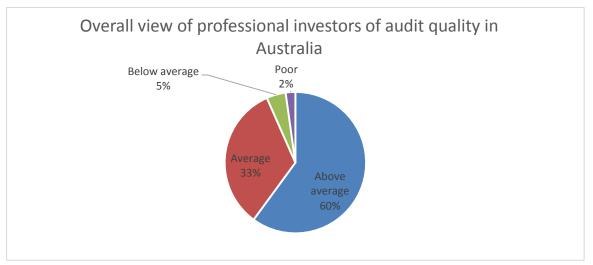

Figure 1

Defining and measuring audit quality is challenging. We sought professional investors' views on the factors which influence their perception of the quality and the value of audit.

The most important factors influencing their **perception of audit quality** (question 1) are:

- The quality of financial reporting disclosures (rating 3.58/4);
- Reported episodes of fraud within audited companies (rating 3.52/4); and
- Quality of information contained within the auditor's report (for example key audit matters) (rating 3.51/4).

The most important factor influencing their **perception of the value of the audit** (question 2) is the quality of the information contained in the auditor's report (rating 3.67/4).

We also asked what audit regulators and standard-setters should prioritise going forward (question 3) and professional investors indicated support for prioritising:

- Going concern judgements and disclosures;
- Developing and monitoring robust audit quality indicators; and
- Ascertaining appropriate level of assurance on Non-GAAP Financial Measures (NGFMs).

In summary, based on the responses to their overall view and the questions, this survey indicates that professional investors are not concerned that audit is not achieving its objective of providing confidence in the quality of the financial report.

The following section of this report provides the results and a comparison of the feedback from Australian investors compared to those of the international CFA Institute Member survey.

### Q1 If you monitor any of the following factors, please indicate how important they are in influencing your perception of audit quality?

The professional investors were asked to rate the following from (1) Not important at all to (4) Very important. This table presents the factors in descending order.

	Factor	Australian results	CFA Institute results	Difference
Quality of financial reporting disclosures	Output	3.58	3.67	.09
Reported episodes of fraud within audited companies	Output	3.52	3.84	.32
Quality of information contained within the auditor report (for example Key Audit Matters)	Output	3.51	3.63	.12
Liquidation or any evidence of financial distress of audited companies	Output	3.40	3.52	.12
Regulators' significant concerns on reporting issues	Output	3.38	3.52	.14
Lawsuits or regulator investigations of auditor due to reporting failures	Output	3.34	3.63	.29
Restatement of company financials	Output	3.30	3.66	.36
Evidence of inconsistent implementation of accounting standards across similar companies	Output	3.25	3.62	.37
Issues of ethics in non-audit services	Input	3.25	3.37	.12
Audit regulator sanctions and their size and nature	Output	3.14	3.43	.29
Training and accreditation of audit personnel	Input	3.09	3.27	.18
Industry expertise of audit personnel	Input	3.06	3.42	.36
Auditor use of experts such as valuers, tax specialists, actuaries, surveyors	Process	3.05	3.25	.20
Audit regulatory inspection findings	Output	3.03	3.45	.42
Audit fees relative to fees charged for non-audit services	Context	3.03	2.86	.17

	Factor	Australian results	CFA Institute results	Difference
Composition and effectiveness of audit committee	Input/ process	3.00	3.16	.16
The quality of auditor oversight on the work of external specialists	Process	3.00	3.19	.19
Frequency of change in auditors	Context	2.98	3.45	.47
Tenure of engagement partner	Context	2.97	3.04	.07
Tenure of audit firm	Context	2.92	*	
Extent to which an independent audit regulator has oversight on audit and assurance services	Process	2.89	3.33	.44
Extent of use of data analytics and artificial intelligence to determine audit scope, coverage, risk assessment and detailed testing	Process	2.85	2.97	.12
Size and cross border reach of audit firms	LInput	2.85	2.80	.05
Extent to which non-audit services are part of audit firm service offerings and have an impact on firm culture	Input	2.84	3.02	.18
Issues arising within the international / multiple country (if applicable) network of the audit firm	Context	2.80	2.97	.17
Audit fees relative to peers	Context	2.53	2.71	.18
Audit firm recruitment and retention practices	Input	2.48	2.74	.26
Number of audit staff per audit partner	Input	2.40	2.80	.40

The CFA Institute noted that academics, audit regulators across the globe, and investors have continually grappled with the definition, composition and measurement of audit quality. Across these groups of stakeholders, audit quality tends to be evaluated based on input, process, output and contextual factors, and so determined the above factors on that basis as evidenced in research<sup>#</sup>. These factors are consistent with those in the <u>IAASB's Framework for Audit Quality</u>. The factors are not intended to be exhaustive, and we asked investors if there are any other factors they consider when assessing audit quality, however no other factors were identified by investors.

<sup>\*</sup> Not asked by the CFA Institute

<sup># &</sup>lt;u>Audit Quality: Insights from the Academic Literature</u> 7 W. Robert Knechel, Gopal V. Krishnan, Mikhail Pevzner, Lori B. Shefchik, and Uma K. Velury, "Audit Quality: Insights from the Academic Literature," Auditing: A Journal of Practice & Theory, Vol.32, Supplement 1 (2013): pp 385–421.

Professional investors consider the outputs from the audit ie. quality of financial disclosures (rating 3.58/4), reported episodes of fraud within audited companies (rating 3.52/4), and the quality of the information in the auditor's report (rating 3.51/4) as the most important factors that influence their perception of audit quality. This is consistent with those of the CFA Institute except that the reported episodes of fraud within audited companies was ranked the highest factor internationally.

Professional investors see a clear link between audit quality and the quality of the financial report....

The survey results tell us that professional investors see a clear link between audit quality and the quality of the financial

report, which demonstrates the key role auditors play in contributing to the quality of financial reporting.

The quality of the information in the auditor's report is a very important factor influencing both professional investor's perception of audit quality and the value of audit (see question 2). The auditor's report has recently been enhanced to communicate more about the audit process. The major enhancement was the communication of key audit matters which are the most significant matters on which the auditor focused and how these were addressed. We also asked professional investors if the inclusion of key audit matters had an impact on their perception of audit quality, and 68% of respondents indicated key audit matters has had some positive impact on their perception of audit quality. This survey demonstrate that professional investors consider that key audit matters have been a valuable enhancement to the auditor's report.

Liquidation or any evidence of financial distress of audited companies, regulators' significant concerns on reporting issues, lawsuits or regulator investigations of auditors due to reporting failures, restatement of company financials, evidence of inconsistent implementation of accounting standards, and auditor regulator sanctions are the next most important output factors. These are observable factors which would indicate lower audit quality.

Other observations are:

- Regulators' significant concerns on reporting issues rated higher (rated 3.38/4) than regulatory inspection findings (rated 3.03/4). This is further support that professional investors' focus is on the financial report. Both these factors rated lower than in the CFA Institute's survey. Also 34% of respondents indicated that they do not monitor audit regulatory inspection findings.
- Issues of ethics in non-audit services (rated 3.25/4) was an important factor which is consistent with the current focus on ethical matters.
- There has also been recent scrutiny and concern in relation to auditor independence and the level of non-audit services being performed by auditors. Audit fees relative to fees charged for non-audit services was rated as 15 out of 28 in the order of importance.
- Many of the remaining factors are about the input, process and contextual factors and professional investors do not consider them as important when assessing audit quality, and some indicated they do not monitor all of these. Many of these factors are also not as readily observable except through the audit firm transparency reports.

### Q2 How important are each of the following factors in influencing your perception of the utility and economic value to investors of audit services (i.e. current and future audits)?

The professional investors were asked to rate the following from (1) Not important at all to (4) Very important. This table presents the factors in descending order.

	Australian results	CFA Institute results	Difference
Quality of information contained within the auditor's report (for example Key Audit Matters)	3.67	3.65	.02
Audit firms' communication to investors (e.g. published audit firm transparency reports)	3.31	3.40	.09
Use of data analytics and artificial intelligence whilst conducting audits	3.07	3.02	.05
Cost efficiency: Leveraging technology, network alliances and process efficiency to reduce the costs of conducting audits	2.85	2.77	.08
An expansion of the current scope of audit and assurance services	2.82	2.91	.09

The results are consistent with those of the CFA Institute indicating Australian professional investors have similar views to those internationally.

The quality of the information in the auditor's report is the most important factor influencing their perception of the **utility and value of the audit**. The quality of information in the auditors' report was also the third most important factor influencing investors' perception of **audit quality** (question 1). The auditor's report has recently been enhanced to communicate more about the audit process. Refer to question 1 for more detail on the enhanced auditor's report.

Audit firms' transparency reports<sup>\*</sup> are also important to professional investors when assessing the utility and value of audit services. The objective of these reports is to provide transparency to the market about the firms and audit quality indicators.

The next most important factor was the use of data analytics and artificial intelligence by the auditor. This rated higher than cost efficiencies from technology which may indicate that the use of technology to enhance audit quality is more important to investors than any potential for it to reduce the cost of the audit.

<sup>\*</sup> Section 222 of the Corporations Act 2001 requires audit firms who conduct 10 or more audits of listed companies, listed registered schemes, authorised deposit-taking institutions, APRA regulated entities, or any other bodies prescribed by the regulations, to publish a transparency report on their website

An expansion of the scope of audit and assurance services rated as moderately important (rating 2.82 /4) when assessing the value of an audit, however investors have rated consideration of some level of assurance over non-GAAP measures and other information disclosed outside the financial report as a relatively high priority for regulators and standard setters.

## Confidential Draft

### Q3 What level of priority do you think audit regulators and standards-setters should give for each of the following?

The professional investors were asked to rate the following from (1) Not important at all to (3) Very important. This table presents the factors in descending order.

	Australian results	CFA Institute results	Difference
Going concern judgments and disclosures	2.67	2.65	.02
Developing and monitoring robust audit quality indicators	2.57	2.71	.14
Ascertaining appropriate level of assurance on Non-GAAP Financial Measures (NGFMs)	122.51	2.46	.05
Assurance or some other level of auditor comfort on other financial and non-financial information disclosed in or outside the Annual Report	2.44	2.39	.05
Enhanced standards for auditor independence	2.43	2.88	.45
Continued adoption and effective implementation of the enhanced auditor's reporting model	2.20	*	
Enhanced audit standards for subsidiary audits	1.84	2.56	.72
Assurance or some other level of auditor comfort on preliminary announcements	1.82	2.21	.39
Requiring shareholder ratification of auditor appointment	1.81	2.26	.45
Requiring shareholder voting for audit committee members	1.67	2.24	.57

Going concern disclosures and judgements is the area professional investors want regulators and standard setters to prioritise. This reinforces the importance of adequate disclosures to alert investors if there is a material uncertainty in relation to going concern and that they see auditors having a key oversight role.

Developing and monitoring audit quality indicators was the next most important factor which would allow them to assess audit quality on an ongoing basis.

<sup>\*</sup> Not asked in the CFA Institute survey

The next two priorities are in relation to ascertaining an appropriate level of assurance over Non-GAAP Financial Measures (rated 2.51/3) and information disclosed in or outside the Annual Report (rated 2.44/3). Australian investors rated this slightly higher than international investors in the CFA Institute's survey.

The highest rated factor for international investors was enhanced standards for auditor independence. This did not rate as high for Australian investors.

### **Appendix 1: Raw data of results**

#### **Overall Results:**

q1. Which of the following best describes your current role in your organisation?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Portfolio / investment / fund manager	20	42.6	43.5	43.5
